1968 – 1970	Architectural Assistant; Lawdon Ltd (Developers)

SUMMARY OF EXPERIENCE:

Following a wide ranging architectural career, including detailed involvement with all design and construction stages of local authority and speculative housing, education projects, commercial and industrial developments, he developed his career into associated fields involving environmental and waste management activities, both in the UK and abroad.

During employment with Mott MacDonald, he became involved additionally in health and safety and quality assurance matters, ultimately providing internal Planning Supervisor (now CDM Co-ordinator) services to other business units within the Group and carrying out the role of divisional quality assurance engineer for the environmental consultancy unit.

Since joining Grove Millican in 2001, he has returned to providing architectural design and general construction advice on a wide range of projects for local authority, housing association and other private, corporate and public clients, in addition to further developing his building surveying skills.
